

Tora Sandhi Kamulian

Unreal Engine C++ / Gameplay & Multiplayer Programmer

torasandhidev@gmail.com | github.com/torasandhi | [LinkedIn](#) | itch.io

PROFILE

Game programmer focused on Unreal Engine 5, C++, multiplayer systems, gameplay architecture, replication, Gameplay Ability System, debugging, and functional testing. Experienced contributing to an existing Unreal production and building scalable gameplay systems for personal and team projects.

PROFESSIONAL EXPERIENCE

Busy Beaver Studio - Game Programmer Intern

Jan 2026 - May 2026

ANDALAS: Realms of Eternal Lights - Unreal Engine production project

- Contributed gameplay programming within an existing Unreal Engine production project.
- Worked with Gameplay Ability System, Gameplay Tags, debugging, and feature integration.
- Created and maintained gameplay functional tests, including custom testing utilities and nodes when built-in functionality did not fit project requirements.
- Worked with and learned from more experienced Unreal developers across production workflows.

Production source code is proprietary and is not publicly available.

SELECTED PROJECTS

Carnifall - Unreal Multiplayer Rebuild

IN DEVELOPMENT | UNREAL ENGINE | C++ | UP TO 4 PLAYERS

Reworking the original single-player Unity tower-defense third-person shooter into a multiplayer co-op Unreal Engine project.

- Client-host / listen-server architecture, replication, server-authoritative gameplay, sessions, lobby flow, and server travel.
- Steam / Online Subsystem integration, replicated inventory and equipment, weapon systems, GAS, Gameplay Tags, Enhanced Input, UI, and multiplayer debugging.

Aetheria

SOLE PROGRAMMER / GAME DESIGNER & PROGRAMMER | UNREAL ENGINE

Tower Defense Roguelite made during a game-development bootcamp. Built gameplay systems, enemy AI, wave systems, and combat flow.

The Journey of Qeva

SOLE PROGRAMMER | GEMASTIK XVII 2024 FINALIST | UNREAL ENGINE

First team game project and first Unreal Engine project; responsible for core gameplay programming.

D'Greek Cook

GAMEPLAY PROGRAMMING & SYSTEM DESIGN | UNREAL ENGINE TO UNITY

Overcooked-inspired team project. Restructured gameplay systems while transitioning the project between engines.

Kala: The Dark Ritual

GAMEPLAY PROGRAMMING | FAST-PACED FPS

Contributed enemy AI, weapon and combat systems, object pooling, and asset / animation integration.

TECHNICAL SKILLS

Engines

Unreal Engine 5, Unity

Languages

C++, C#

Unreal / Multiplayer

Multiplayer replication, server-authoritative gameplay, Online Sessions, Gameplay Ability System, Gameplay Tags, Gameplay Framework, Enhanced Input

Architecture / Workflow

Gameplay architecture, scalable modular system design, functional testing, debugging, feature prototyping

MENTORING

Game Programming Mentor

UKM Gamespace | Feb 2025 - Jun 2025

Mentored junior students in Unreal Engine fundamentals, Blueprint basics, Gameplay Framework, player input, Character Movement, level travel, project setup, packaging, and debugging.

EDUCATION

Politeknik Elektronika Negeri Surabaya

Applied Bachelor's in Game Technology
2023 - 2027
